PROFILE

Software Developer & Solution Architect Specialized in TypeScript, NestJS, Prisma, and Java/Spring, with a proven track record of designing modular, scalable architectures that balance performance and maintainability. Adept at implementing defensive validation patterns and semantic folder structures to ensure systems remain robust, extensible, and easy to navigate.

Recognized for transforming complex workflows and ambiguous requirements into documented, reproducible solutions through precise technical communication and comprehensive Swagger-driven API documentation. Passionate about building software that is not only functional but also elegant, transparent, and future-proof.

EMPLOYMENT HISTORY

❖ **Freelance software developer, Self-Employed** Sept 2024 — Present

- Developed custom software solutions for clients, enhancing business efficiency by 30%. Collaborated with cross-functional teams to deliver projects on time and within budget.

❖ **Software developer, Discord Bots, Dream Junk Studios** Sept 2022 — Aug 2024

EDUCATION

❖ **U.P.T.N.M 'Ludovico Silva'** 2022
University

PNF en Informática: 2022, now

❖ **U.E 'Las Garzas'** 2022
Bachelor of Science

SKILLS

Frontend	Backend
HTML	Node.js
CSS	Express.js
JavaScript	JavaScript
React.js	TypeScript
TypeScript	MongoDB
Vite.js	MySQL
Redux	Socket.io

Sass	Python
EJS	Java
Tools	Spring Framework
Git	Discord.js
Visual Studio Code	C Language

LANGUAGES

English	B2	Spanish	Native speaker

PROJECTS

❖ Gestini

In Gestini, I worked with an architecture that supports both desktop and web applications using Electron. I worked with databases like MySQL and MongoDB, using Spring and Java for the backend. I also configured multiple environments (production and development) and automated deployment tasks (CI/CD) with GitHub Actions. I collaborated closely with designers to build interfaces.

❖ SIGE

SIGE is a business management platform where companies can manage projects and tasks comprehensively. It includes a community section for real-time chat and post creation.

❖ Detail Plumbing

On this project, I used NestJS with TypeScript and Prisma ORM. The challenge was developing a platform for plumbing company management, including inventory, products, and project time tracking. It features a plan editing system that allows marking house or building plans, measuring materials, calculating areas and heights, and generating material and labor cost reports.

❖ Marvig

Marvig is a platform that allows hotel reservation management, enabling clients to book rooms and administrators to have an inventory of all rooms and comprehensive control over client reservations.
