PROFILE

Software Developer with +7 years of experience, focused on building maintainable and efficient applications using NestJS and Spring Boot. Ability to translate business needs into efficient and secure technical functionalities applying design patterns to improve code readability and maintainability. Proven track record in leading end-to-end development cycles, automating CI/CD pipelines, and optimizing cloud infrastructure to maximize operational efficiency and technological profitability

EMPLOYMENT HISTORY

Co-Founder, Gestini | *Buenos Aires, Argentina (remote)* | *Full-time* | *Jun. 2024 - Present*

- Co-founded and led the architectural design of a multi-tenant ERP platform targeting retail and commercial businesses.
- Defined the core system architecture, including branch-level tenant isolation, granular RBAC authorization, and transactional consistency strategies.
- Designed and implemented direct fiscal integration with Argentina's AFIP API for compliant electronic invoicing.
- Led the technical development and implementation of a hybrid solution using Electron with a decoupled Spring-based backend.
- Designed relational database schemas and managed versioned migrations using Hibernate and Liquibase.
- Automated CI/CD pipelines to ensure reproducible deployments across production environments.
- Made strategic decisions regarding technology stack, infrastructure, and long-term technical roadmap aligned with business objectives.

Fullstack Developer, Detail Plumbing | *Miami, FL (remote)* | *Freelance* | *Sep. 2024 - May. 2025*

- Developed precision tools for editing PDF plans.
- Automated budget calculations and material estimations from digital measurements, reducing manual errors and operational time.
- Implemented a robust RBAC (Role-Based Access Control) system and change tracking to ensure total oversight of project reviews.
- Spearheaded the diagnostic phase through professional interviews, identifying and resolving critical industry bottlenecks.

Fullstack Developer, Dream Junk Studios | *Miami, FL (remote)* | *Full-time* | *Sep. 2022 - May. 2024*

- Developed a business management system with an integrated social network, ensuring modular folder structures and semantic DTO validation.

- Created Discord bots with custom functionalities to automate workflows and enhance community engagement.
- Collaborated closely with UI/UX designers, ensuring defensive validation and seamless integration of user interfaces.
- Implemented automated CI/CD deployment using GitHub Actions, ensuring continuous integrations and reliable deliveries.

Software Developer, Freelance | *Full-time* | Jan 2018 - Oct 2022

- Developing robust APIs and maintaining servers for diverse clients using NestJS
- Optimized complex business logic by implementing Builder and Specification patterns, significantly improving code maintainability within audit-filtering systems.
- Resolved critical infrastructure incidents (Nginx, Certbot SSL, Docker) across Google Cloud environments, ensuring high availability through documented and reproducible solutions.
- Developed custom integrations and Discord automation bots to streamline internal workflows and enhance operational efficiency for diverse clients.

SKILLS

- Programming Languages & Frameworks: TypeScript (NestJS), Java (Spring Boot), JavaScript (Node.js/Express.js), C & Python. Building interfaces with React.js, Redux, TailwindCSS, Sass, and CSS3.
- Databases & ORM: Prisma ORM, Hibernate, Spring Data JPA, Liquibase, MySQL, PostgreSQL, MongoDB.
- Infrastructure & DevOps: CI/CD (GitHub Actions), Docker, Nginx, Certbot (SSL), Google Cloud, AWS.
- Specialized Development: ElectronJs, Discord.js, Websockets.

EDUCATION & LANGUAGES

- Ingeniería en Informática: U.P.T.N.M "Ludovico Silva" (Mar 2025 - Feb 2027).
- T.S.U. en Informática: U.P.T.N.M "Ludovico Silva" (Oct 2022 - Feb 2025).
- Languages: Spanish (Native Speaker), English B2.
