PROFILE

Software Engineer with over 7 years of experience, specializing in building maintainable and efficient applications using **NestJS** and **Spring Boot**, following **Agile** and **Scrum** methodologies, with strong technical leadership skills and effective communication abilities to translate business requirements into reliable and efficient technical features, applying design patterns to improve code readability and maintainability. Proven track record leading **end-to-end** development cycles, automating **CI/CD** workflows, and optimizing cloud infrastructure to maximize operational efficiency and profitability.

EMPLOYMENT HISTORY

Co-Founder, Gestini | *Buenos Aires, Argentina (remote) | Full-time | Jun 2024 - Present*

Description: SaaS solution for administrative management and electronic invoicing for small and medium-sized businesses.

- Directed strategic decisions regarding the technology stack, infrastructure, and long-term technical roadmap, aligning them with business objectives.
- Contributed to the design and implementation of direct tax integration with the "**ARCA**" (Argentina) API for issuing compliant electronic invoices.
- Designed the checkout module with **MercadoPago**, handling online payments and real-time transaction updates using webhooks.
- Implemented a specialized **AI agent** for data extraction and analysis, reducing manual intervention across multiple workflows and enabling faster, more consistent decision-making throughout the platform.
- Designed the database architecture and versioned migration strategies (**Liquibase**), ensuring the secure evolution of the system in production.
- Led code reviews and architectural standards to ensure consistency and maintainability across the team.
- Automated **CI/CD** pipelines to ensure reproducible deployments in production environments, reducing processing time.

Full-Stack Developer, Detail Plumbing | *Miami, FL (remote) | Freelance | Sep 2024 - May 2025*

Description: Web platform that restructured the entire quoting and materials-management workflow, removing manual steps, centralizing blueprint processing, and supporting consistent operational decisions across all active projects.

- Managed the diagnostic phase through professional interviews, identifying and resolving critical bottlenecks.
- Systematized the calculation of budgets and material estimates based on digital measurements, reducing manual errors and processing times.
- Created precision tools for editing drawings in digital blueprints.
- Applied a robust "**RBAC**" system and change tracking (audit log) to ensure full oversight of project revisions.

Full-Stack Developer, Dream Junk Studios | *Miami, FL (remote) | Full-time | Sep 2022 - May 2024*

Description: A company specializing in technology development, video game development, and marketing.

- Architected a business management system with an integrated social network that unified communication, boosted engagement in internal projects, and established a centralized space for collaboration within the organization.
- Built **Discord bots** with custom features to automate workflows and improve community engagement, reducing operating costs.
- Collaborated closely with **UI/UX** designers, ensuring validation and seamless integration of user interfaces.

Software Developer, Freelance | *Full-time* | *Jan 2018 - Oct 2022*

Description: Development of APIs and automation tools for B2B clients (auditing, Discord bots, integrations).

- Engineered robust **RESTful APIs** and maintained multi-client server environments using NestJS, supporting several B2B platforms with consistent performance and reliability.
- Optimized complex business logic by implementing Builder and Specification patterns, significantly improving code maintainability in audit filtering systems.
- Resolved critical infrastructure incidents (Nginx, Certbot SSL, Docker) in Google Cloud environments, ensuring high availability through documented and reproducible solutions.
- Developed custom integrations and automation bots for Discord, streamlining internal workflows and improving operational efficiency for various clients.

SKILLS

- **Programming Languages and Frameworks**:
  Backend: TypeScript (NestJS), Java (Spring Boot), JavaScript (Node.js/Express.js), Python (Flask), GraphQL, C.
  Frontend: React.js, Next.js, Zustand, Redux, TailwindCSS, Sass, CSS.
  Unit testing: Jest, Mockito.

- **Architecture & Patterns**: Hexagonal Architecture, Clean Architecture, SOLID Principles, Dependency Injection, Repository Pattern, DTOs, Mappers, and Design Patterns (Builder, Specification, Factory, Observer).

- **Databases & ORMs**:
  MySQL, PostgreSQL, MongoDB, Prisma ORM, Hibernate, Spring Data JPA, Liquibase.

- **Infrastructure & DevOps**:
  CI/CD (GitHub Actions), Docker, Nginx, Certbot (SSL), Google Cloud, AWS.

- **Specialized Development**: Electron.js, Discord.js, WebSockets.

EDUCATION

- **Computer Engineering**: U.P.T.N.M “Ludovico Silva” (Mar 2025 - Present)
- **Associate Degree in Computer Science**: U.P.T.N.M “Ludovico Silva” (Oct 2022 - Feb 2025)

LANGUAGES

- **Spanish**: Native
- **English**: B2
